

EDWARD JOSEPH WHITLOCK (1913-2001)

I received a letter from Marianne Whitlock to advise that Ted Whitlock had died January 11, 2001 in Raymore, Saskatchewan. Ted's family came from Chelsea, London and we had corresponded since Feb.1985 when Ted first wrote and asked about the Whitlock Family Association.

In all that time we were only able to get Ted's family back one more generation from what he already knew to William Douglas Whitlock (1799?-1842) In the early 1990's we determined that Marianne Whitlock was also descended from the same family as Ted and they corresponded as well.

Ted was always on the lookout for Whitlocks and I was always pleased to get his extracts from the "Last Post" list in the Canadian Legion publication. In 1998 Ted advised he had been diagnosed with lymphatic leukemia but his letters were still full of the funny side of life. Ted was a kind and generous person and I will miss him.
