Dec 1982

Dear Peter,

Thankyou for your current report, which arrived today
I see that my brother Christopher informed you of the death
of our younger brother HERVEY FRANK WHITLOCK in Brazil in
August last ¹⁹⁸¹ year. He married a local girl there many years
ago, and he leaves a widow, Ilma, and five children, none
of whom can speak a word of english. He was named after
an uncle of my father's. I was told by my Uncle Sid that
it was a very old family name, and that he had seen it on
tombstones in Pitton. He also carried on a correspondence with
a well-known writer and radio broadcaster called
Ralph Whitlock, a farmer in Wiltshire, who wrote on farming
and nature topics. I wish I'd known you were going to Yorkshire.
The youngest of the five of us, Quentin Whitlock, is an
expert computer programmer and consultant. As a lecturer at
Sheffield University for some years he was closely associated
with a department set up at government request, to help small
businesses enter the computer age. He now runs his own show.
You could try writing to him, and explaining what you want.
He's at 265 Abbeydale Road, South, Sheffield, Yorks.
I'll tell him you may be getting in touch with him, in case
he'd like to help.

Best wishes,

Joan

P.S. Send phone No.?
