Not a lot, I know, but perhaps you can use some of it.

I have been very hot on the trail of my various branches and seem to have found no end of "offspring", unfortunately they seem to be mostly of the brothers and sisters of my direct lines rather than my own little lot. Nevertheless I find it quite exhilarating when I do find the families of the girls, especially as by the time I have gone over and over the census I have almost forgotten which names I AM looking for! My three lines, CLARK, MATTINGLEY and ODELL all moved around the Hayes, Hillingdon, Yiewsley area and they seemed to have dozens of kids each, any of these names I find must be mine, so I happily take references to all, the ones that give me the problems are, as I said, the girls, who naturally change names on marriage. I had a lucky find yesterday, looking for something else, I found, not only the baptisms of two girls, but their marriages as well, almost immediately afterwards I found one of the husbands as a child with his family on the census, again, I was not looking for him, he just popped up!

We are enjoying some beautiful weather right now, it is just right, warm days and coolish nights, how long it will stay like this goodness knows.

Gerry has returned from his trip, he had a lovely time and did all the things he wanted to do, so is reasonably content for a while!

Hope all is well with you and Sue.

Regards,
