Dear Peter,

This article was posted on the Internet by the g-grandson of the writer John B. Blair. Interesting that I picked it up on the RHEA discussion group since that is a RHEAY mentioned in the article as well.

The mention of the WHITLOCK MOUNTAIN is interesting. As well as I can deduct from the writing it must be in the area near the Hiawassee River. This river is in East TN about 30 miles northeast of Chattanooga. Have you had a reference to it by anyone?

I'm still working on downloading the GEDCOM files from the World Family Tree. Some of them are quite large and take a long time to download. I'll get them in time.

Take care.

Earl
