Subject: Thanks for disk

Peter

I received the whitlock.ged data disk and have attached it to my records. I notice a few differences but expect that your records are more correct than mine. My records show that a Walter Whitlock as the first child of Silas Whitlock and Mary Hooper. You also had another child William Silas you died at age 7. I will check this with my mother. Maybe they are the same person. My mother Evelyn Whitlock Horne is a granddaughter of Silas. Which line do I follow for you? I know you start with Richard Whitlock, as I do, but from there I'm lost.

Recently I received an e-mail from a Dick Whitlock in Pretoria South Africa. He has a web site at <http://home.pix.za/dw/dw000002/> ? Help M Main Menu P P O OTHER CMDS V ViewAttch N NextMsg Soc NextPage U Undelete F ForwardENDRec etoria South Africa.

I noticed in your newsletter of June 1997, that you were interested in setting up a home page. Maybe this is a good place to connect to. I must check it out also.

His e-mail is dw000002@pixie.co.za

also received e-mail from LJurgilewi@aol.com He is searching for a Casey Andrew Whitlock, son of Simon About 1858. I told him I had no information, but maybe you do.

Happy searching.

Is there anything I can provide you (in a GEDCOM format)?

Ruth Johnson
