Subject: Whitlock's

Date: November 7, 1999 12:23 PM

Peter,

When I first started looking into tracing my father side of the family I heard there was a man doing the research by the name of Elliott Whitlock of Glencoe Ont. So I wanted to get in touch with him. I called information to get a phone # to contact him. I called and talked to his wife Mable and found out Elliott had died that year. She gave me her son's {Beverly} phone # and I talked to him. He told me his dad had written a book on the Whitlock's but he didn't have any of them, and he didn't know how I could get one. But he would check, I have not heard from him. He said his grandfather was a John F. Whitlock that married a Alice Waterworth and they had a few children. Elliott's brother's and sister's were: Helen, Pauline, Blanche, Clare, and Earl. In our family we have a Earl and he had a sister Blanche, and Blanche had a daughter Pauline, what a coincidence don't you think. I don't know if this tells you anything or not, but my dad's cousin Hugh said He thought the Whitlock's in Glencoe were shirt tail relatives, and he had met Bev. Peter, in the packet I sent you did I send you the census with Susanna Whitlock and her son Richard, I could not remember I sent you quit a bit of stuff. By the way the other people I have Cc mail this to are my brother and sister and a niece and a nephew, just thought I would let you know. Of course you know Cuma. Let me know what you think. Don't rush my E-mail is not like your's. I'm glad you had a great trip sometimes you need to get away from this for a while. I really get to you at times. Thank's Peter, for all your help and input, I can use the help. Rita
