I recently met Robert Whitlock of Minneapolis while I was in Florida for the winter. He and I talked about the above and he gave me your name. My Uncle Hugh did a study of the Whitlock family in 1942. I just sent Robert a copy of same. I have been doing some of the same in the past few years but don't seem to be making too much headway. He suggested I contact you and gave me the above information including your website but so far I have been unable to bring it up even though my wife's son-in-law could do so 50 miles away the other day. I am sure it is my lack of expertise that has prevented me from doing hence this means of communication.

I am a retired OB-Gyn physician having practiced in Elgin, IL for 45 years. I have married my high school sweetheart and now live in Southern Illinois from where my Whitlock family group evolved.

I will not bore you with other information but would certainly love to hear from you about your studies etc.. If there is a cost to same do not hesitate to inform me.

Thanking you in advance I remain,

Very truly yours, Richard F. Whitlock, M.D.
