Hi Peter and Patrick

Good to hear from you. We got our flu shots between Xmas and New Years, and have been sick ever since. Ken got just a plain old nasty cold, and he was just about over it when I got a torso attack of travelling pain with muscle spasms included. The spasms occur just as I am about to get out of bed in the morning, and Ken will find me on the floor or upside down trying to avoid them.

I have taken to sleeping on the couch kind of propped up so that in the morning there is no back action to getting up and around. I can't go very far, just about as long as my electrical cord on my heating pad will let me. Reminds me of mother's electric broom - just enough cord to fly around Sapperton!

About the info you need - June Sandra Smallcombe - DOB June 1, 1954

Dad died at New Westminster on December 12, 1974. And you are right about time - Monday will be all of two months since we lost Ross, and I still miss him so. I guess because when he and June split, he spent a lot of time with Ken and I. He was such a pleasure to cook for, and I would send him home with enough prepared for for the following week. We talked on the phone almost every day.

Ward and Donna left for Cancun on the 20th of January for a week - a month would be better to really feel like you had a long holiday and get back to look forward to spring, although once Christmas is over, we always are looking to spring, which is a long way off yet. Glad to hear from you, and would I be considered eligible to receive the newsletter for 2005? Toni
