Dear Mr. Whitlock,

I am the daughter of Robert H. Whitlock, from Bay Village, Ohio. I am writing to ask if you are the same Peter Whitlock who assisted my father with our Whitlock family genealogy in 1985.

If you are the same Peter Whitlock, I would like to thank you for all the help you gave to him. I remember your name being mentioned repeatedly when my dad was doing his research.

I was reminded of you because I am in the process of re-typing the family genealogy book that my dad put together for all of his children, in order to save it to disk as well as make copies for his grandchildren.

I am absolutely amazed at the information you were able to supply my dad with, as well as information he was able to obtain from other sources. I have been looking on line for any new information that I might be able to add, but I find I am easily confused as to which Whitlock belongs where, even with my dad's book as a blueprint! I can't imagine how confusing compiling and recording this information by hand must be.

Sadly, my father died on December 19, 2003 at the age of 84, but a part of him lives on through the genealogy book he put together with your considerable help. When I sent a "new" copy of his book to my brother, he said reading it again was like "having dad back". It brought back very fond memories of a man whose children adored him!

I entered the information from my dad's book on line at Ancestry.com, under the name The Whitlock Family. The only new information that I could add to my dad's research from 1985 were the births of new grandchildren and great grandchildren, and, sadly, the dates of death for my dad, mom, and sister.

Once again, thank you for all of the help you gave to my dad. I wanted to let you know that your efforts are still appreciated twenty two years later!

Sincerely yours,

Sally Whitlock Brugh
