I was just doing some searching and found the 1860 Census that has Joshua Whitlock and his family listed. I'm descended from that line. But I notice the ages they have listed for him and all the kids do not align with the ages listed in the Whitlock41.rtf file on the Whitlocks Association site. They all seem to be 2-3 years off. Is there any way to find out how the birth dates were obtained for him and his family?

Also, I am the son of David Allen Whitlock (he was adopted as John Owen White). How would I go about information on my dad updated (he died last year) and getting me, my sisters and our kids added to the files?

Finally, is there a GEDCOM file anywhere for the entire Whitlock tree? It would be much easier to find information in that than trying to dig through .rtf files.

Thanks...Curtis White
